PMS Interface
for Microsoft Dynamics 365 Business Central

Interface with **protel PMS** for hotels and hotel chains using Microsoft Dynamics 365 Business Central for AFC operations, based on Tempo Zero Cloud

NAV-lab network concentrates the efforts and investments of the software houses that compose it, to create effective and innovative solutions for companies.
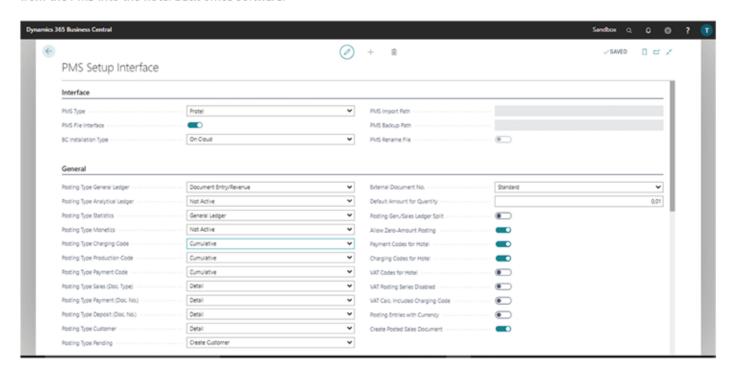

The best and most innovative projects developed in each company of the group are shared with the NAV-lab R&D team and optimized for the more general market and for specific sectors. This is how **Tempo Zero** and **Tempo Zero Cloud** were born, quick to implement and easy to use solutions for Italian SMEs that choose **Microsoft Dynamics 365 Business Central** ERP for integrated business management.
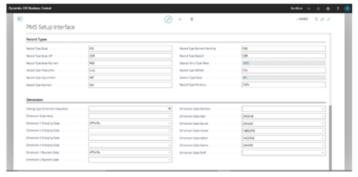

On this basis, the NAV-lab R&S team has created **PMS Interface**, the cloud App for hotels and hotel chains that allows protel PMS to be connected with Microsoft Dynamics 365 Business Central for the precise and timely management of the hotel back office.

PMS INTERFACE
Simplify the daily work of the Financial Controller

PMS Interface allows the integration of **protel PMS** with **Microsoft Dynamics 365 Business Central** for importing daily data from the PMS into the hotel back office software.

Thanks to various views, **the interface can be highly parameterized** to manage the different types of documents, departments, VAT rates and other setups required to import information from protel PMS.

The CSV files generated by the PMS are acquired, and **accounting batches** are automatically prepared to be recorded within Microsoft Dynamics 365 Business Central. In this way, Back Office is **always aligned** with the PMS from both an accounting and a statistical point of view.

The interface manages the following data streams:

- Production (revenues and collections)
- Documents issued
- Payments
- Statistics

Thanks to a **management dashboard** it is possible to keep under control the different days imported, and any errors found.

DEMO, VIDEO AND ACTIVATION
Contact us to find out more

Request access to videos and demos on **content, methods of use and benefits** for hotel companies that use the PMS interface for Microsoft Dynamics 365 Business Central, or **contact us for more information or for a customized demo**. APP PMS INTERFACE for Microsoft Dynamics 365 Business Central is released in Saas mode (Software as a service): an online service with an annual fee, depending on the amount of invoices managed.
