Tempo Zero Apps integrate and exploit the power of the Microsoft 365 cloud platform to the maximum

NAV-LAB: the power of shared experience

NAV-LAB was founded in 2003 by a group of IT managers who chose to offer their customers the ERP Microsoft Dynamics NAV, now *Business Central*, as a management system capable of giving flexibility, efficiency and competitivity to business processes in SMBs.

Since then, NAV-LAB has become a fundamental partner for Microsoft in Italy.

The success of **Tempo Zero** Apps, which reduces the time of start-up of the ERP in the company, was confirmed by the rapid diffusion in terms of new users, until it became the most widespread solution today in Italy for those who chose the Microsoft ERP.

NAV-LAB's strength is its joint investment in R&D: the software laboratory where technical resources, experience, skills and know-how, gained in the group's 13 software houses, are shared.

The high quality of NAV-LAB's assistance services is highly appreciated, both in the ERP start-up phases, including the study and implementation of customised solutions, and in the subsequent phases of support for users' daily work.

TEMPO ZERO SHIPPING EDI +

The app that integrates and automates warehouse shipment management via couriers in *Microsoft Dynamics 365 Business Central.*

Are you looking for a solution to manage warehouse shipments, including multi-order and multi-package ones, more efficiently, directly from your ERP?

With **Tempo Zero Shipping EDI+** you can automate data exchange between Microsoft Business Central and courier software for warehouse shipment management.

Evolution of Tempo Zero Shipping EDI

The Tempo Zero Shipping EDI+ app is the evolution of the Tempo Zero Shipping EDI app. The latter allows you to manage shipments from sales orders based on the Business Central standard.

Tempo Zero Shipping EDI+, instead, expands warehouse shipment management for those who use ERP and the warehouse module of the Tempo Zero Cloud app.

Pre-requisites

You must have installed the Tempo Zero Cloud app and signed a supply contract with the couriers supported by the app.

TEMPO ZERO SHIPPING EDI +

Improve your company's efficiency

With **Tempo Zero Shipping EDI+** you can manage warehouse shipments, including multi-order and multi-package shipments with single label issuance, automating and optimizing the entire logistics process.

So you can activate a direct connection to the courier's software without leaving *Business Central*, using the warehouse module of the **Tempo Zero Cloud** app.

Increase your productivity

From the ERP dashboard and within Tempo Zero, you can manage and monitor the progress of shipments thanks to the integration of **EDI** (*Electronic Data Interchange*) **technology**.

Once the shipment has been registered, **Tempo Zero Shipping EDI +** automatically transmits the data to the courier, who will send the purchased label to be printed, based on the "warehouse shipment" document.

This total integration into the ERP flow increases the speed of operations, drastically reduces errors and delays, offering an optimal and smooth user experience.
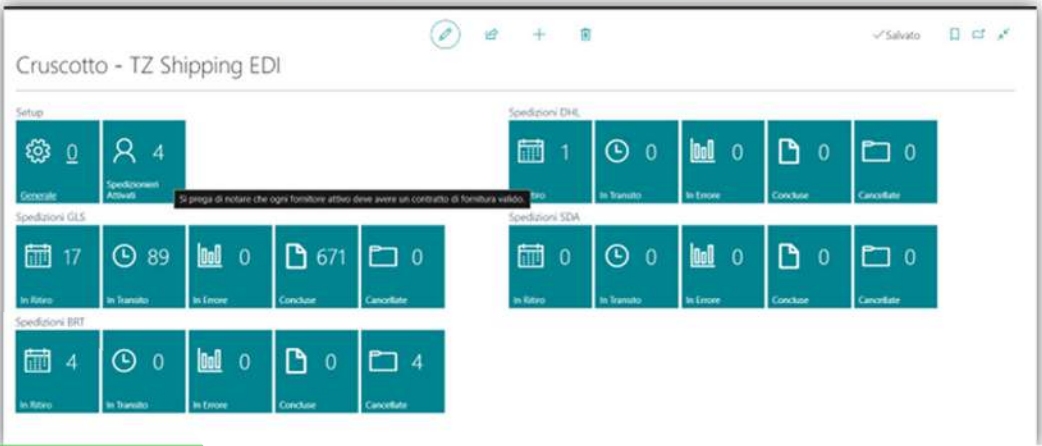

## Benefits for those who manage warehouse shipments via couriers:

- Autonomated shipment management
- Support for multi-order and multi-package shipments
- Monitoring the progress of shipments
- Issuing and canceling shipping labels directly from the ERP
